Scope of the Program

Research plays an important role in development of the society by increasing the quantum of knowledge and solving crucial problems. The ability to do Research and produce Scholarly publications is an extremely important attribute for any academic. The traditional emphasis on factual knowledge and singular truth is diminishing and the knowledge generation based on evidence and context is increasing. Reflected in the level of publication outlet, quality of publications has consistently been recognized as the major criteria of academic excellence. A well-considered publication strategy will help maximise academic impact, support career development and aid in the production of an optimal portfolio of research outputs. The reputation and prestige of the individual academic and their institution relies on publications. The aim of this STTP is to provide the participants with the fundamentals of research design and methodology to conduct relevant research that will aid quality decision making and contribute to the body of knowledge in various areas of interest
